THE IMPORTANCE OF PROFESSIONAL LEARNING

We believe that professional learning is an investment, not a cost

We believe that when the right technologies are placed into the hands of confident and knowledgeable teachers, learning becomes inspirational and accessible for all. Investment in ongoing and measurable professional learning is key to achieving positive transformation, both in and out of the classroom. Our team of Apple Professional Learning Specialists are able to design and deliver tailor-made professional development, focussed on the effective use of Apple technologies to enable digital transformation, both in and out of the classroom.

Our professional learning specialists can empower your school to use Apple technologies to:

- **Enhance the quality of teaching, assessment, and inclusion**
- **Develop 21st-century skills across the curriculum**
- **Inspire life-long learning**
- **Reduce teacher workload**

Did you know...

96%

of teachers rated themselves as extremely satisfied with the quality of professional learning they received.

DESIGNING YOUR PROFESSIONAL LEARNING

When designing a professional learning programme we follow a simple and effective process, which ensures that every school receives targeted and focussed sessions designed to meet their specific requirements.

1

Initial Consultation

One of our Professional Learning Specialists will contact your school and provide an initial consultation, where the priorities for professional learning are established and the measurements of success are determined.

2

Teacher Tech Skills Analysis and Programme Proposal

Your dedicated JTRS trainer will provide your teachers and learning support staff with access to a simple online skills survey, which takes around 5 minutes to complete. The feedback gathered will inform the creation of a bespoke Professional Learning Programme Proposal; which consists of various professional learning formats wrapped within a defined structure. You can find out more about how our Professional Learning is structured and the formats available on the next 2 pages.

FORMATS OF PROFESSIONAL LEARNING

To ensure that we provide professional learning that is both relevant and beneficial to teachers, we deliver sessions in a range of innovative formats. These formats can be mixed into a full day of professional learning and take place during a normal school day, with minimal disruption to timetable or teacher cover. This is why we provide **over 80% of our sessions** as full days during term time.

In-Class (Lesson Modelling & Team Teaching)

Example lessons for teachers to observe or co-teach utilising iPad in the classroom with your pupils. We provide copies of the lesson plans at the end of each session. Classroom Modelling provides meaningful CPD that can take place during a normal school day with no disruption to timetable or teacher cover.

Coaching & Mentoring

1:1 training or small group training for teachers with personalised CPD objectives, including the achievement of the Apple Teacher award.

Curriculum Planning

Support with the development of long-term plans and schemes of work, to effectively integrate effective technology use across the curriculum.

Teacher Sessions

Pedagogical and Curriculum based workshop sessions for teachers, which usually take place after school or as part of dedicated INSET days.

STRUCTURES OF PROFESSIONAL LEARNING

The professional learning formats on the previous page can be incorporated into any of the professional learning structures below. We provide ongoing professional learning programmes and individual tailor made sessions.

Tailor-Made Sessions
