

# Shape the creators of tomorrow with our Photography Package

**Creativity helps students become better communicators and problem-solvers. It prepares them to thrive in today's world and to shape tomorrow's.**

**Every child has their own creativity, but nurturing it is one of the most important things teachers can do.**

The art of photography connects learning to students' everyday experiences.

Communicating a desired message through a photo can be challenging. Capturing and editing photos can enable pupils to expand their thinking and communicate their learning through different mediums, not just text.

Discover BOS, your flexible subscription solution

Ensure your pupils and teachers always have access to the latest Apple Technology.

Instead of buying devices, enjoy a subscription service with a simple monthly payment and refresh your devices every 36 months..
